FreeCodeCamp

Responsive Web Design   **2022**
FreeCodeCamp

LANGUAGES

- English   C2
- Polish   native
- German   A1
- Dutch   A2

ABOUT ME

Frontend web developer with an extensive background as a life science researcher. I combine analytical thinking and attention to detail with a sense of aesthetics. I'm a lifelong learner who is goal-driven, self-motivated and who thrives in an international team with a startup feel. I help others and teach them whenever I can. I love silly jokes, nature, fantasy, cats and gaming.

SELECTED WORK EXPERIENCE

Junior frontend developer   **2023.04 - present**
(ecommerce agency)
eStoreLabs, Warsaw, PL

- Developing UI of the main company project using React, TypeScript, Bootstrap and SCSS, ensuring it matches the provided design and functionality requirements
- Co-creating QA process in the main company project (writing end-to-end tests in Cypress)
- Ensuring code quality by participating in code review
- Optimizing resources to align with core web vitals
- Developed 100+ product cards for implementation in eRetailers storefronts, in HTML, CSS and vanilla JS, according to provided designs and ensuring full compatibility with eRetailer CMS systems, as well as adherence to ARIA and W3C guidelines
- Solving browser compatibility issues and ensuring RWD
- Writing documentation for internal and external developers
- Effectively communicating with non-developers (PMs and graphic designers) to ensure mutual understanding of business requirements and technical restrictions

UX/UI designer (head of design)   **2023.04 - 2023.11**
(startup)
Syntro.ai, Warsaw, PL

- Carried out primary user research, gathered data, analyzed it
- Designed a web app interface based on user needs and created a clickable prototype in Figma
- Created visual identity of the company (logo, social media banners)

Web developer   **2022.11 - present**
(freelance)
mokosh.dev, PL

- Designing and developing websites for clients and deploying them to custom domains

Research scientist (biochemistry, structural biology)   **2016-2022**
University of Groningen, Groningen, NL

- Leading a team of 3 junior researchers, prioritising tasks and projects
- Communicating with both senior and junior specialists using appropriate level of detail for each level of understanding
- Performing literature research, synthesizing information as reports and articles (technical documentation)
- Performing wet lab research, gathering and analyzing data, presenting results to specialists on conferences (talks, posters)
